PROFESSIONAL SUMMARY

Software Development Engineer in Test (SDET) with 3+ years of experience building scalable Test Automation Frameworks across Enterprise SaaS, Web Applications, Mobile Applications (Android/iOS), API Automation, UI Automation, End-to-End Testing, and Quality Engineering ecosystems. Currently driving Playwright TypeScript automation initiatives at Tecsys Inc., developing automation infrastructure for Warehouse Management Systems (WMS), Release Validation, Performance Benchmarking, and PostgreSQL Migration Testing. Expert in Playwright, TypeScript, Selenium, Appium, REST Assured, GitHub Actions, CI/CD Pipelines, Test Automation Architecture, Cross Browser Testing, API Testing, and Shift Left Testing. Proven success reducing regression effort by 34+ hours per release cycle, increasing automation coverage by 30%, and maintaining near-zero production defects.

CORE COMPETENCIES

Playwright • Playwright TypeScript • UI Automation • API Automation • Playwright API Testing • Selenium WebDriver • Selenide • Appium • Mobile Automation • Test Automation Framework Development • Test Architecture • Automation Strategy • Enterprise SaaS Testing • Quality Engineering • CI/CD Pipelines • GitHub Actions • Release Validation • Regression Testing • End-to-End Testing • Cross Browser Testing • Cross Platform Testing • Shift Left Testing • PostgreSQL Validation • Performance Benchmarking

PROFESSIONAL EXPERIENCE

Tecsys Inc. | Software Development Engineer in Test (SDET) | Jun 2026 – Present

- Architect and develop Playwright TypeScript automation frameworks from scratch for enterprise Warehouse Management System (WMS) applications and backend APIs.
- Design scalable UI Automation and API Automation suites supporting Release Testing, Regression Testing, and Enterprise Quality Engineering initiatives.
- Build reusable Playwright fixtures, utilities, API clients, reporting modules, and framework accelerators improving maintainability and execution efficiency.
- Integrate automation assets with internal engineering platforms for Performance Benchmarking and large-scale execution.
- Support PostgreSQL Migration Testing through automated regression validation ensuring functional integrity across database transitions.
- Establish automation standards, framework architecture, coding guidelines, and Playwright best practices across product teams.

Cognizant Technology Solutions | Software Development Engineer in Test (SDET) | Sep 2023 – May 2026

- Owned end-to-end Quality Engineering across AI-powered Web, Mobile, and API platforms.
- Architected automation frameworks using Playwright, Selenium, Selenide, Appium, and REST Assured.
- Reduced regression effort by **34+ engineering hours** per release cycle through parallel execution and framework optimization.
- Increased automation coverage by **30%** through risk-based automation of critical business workflows.
- Built CI/CD Pipelines using GitHub Actions with automated reporting, Release Validation, and Quality Gates.
- Maintained near-zero production defects through robust automation coverage and proactive defect management.

SELECTED ENGINEERING PROJECTS

Playwright UI + API Automation Framework

GitHub: <https://github.com/Dhiman07-create/playwright-e2e-framework>

- Production-grade Playwright TypeScript Framework supporting Chromium, Firefox, and WebKit.
- Integrated UI Automation, API Automation, Parallel Execution, GitHub Actions, and Allure Reporting.

Flipkart End-to-End Automation Framework

GitHub: <https://github.com/Dhiman07-create/flipkart-regression>

- Automated 25+ customer journeys covering Login, Search, Cart, Checkout, and Order workflows.
- Implemented scalable Page Object Model architecture and CI/CD-ready execution.

E-Commerce API + UI Automation Framework

GitHub: <https://github.com/Dhiman07-create/ecommerce-api-automation>

- Automated 50+ API validation scenarios covering CRUD Operations, Schema Validation, Authentication, and Business Workflows.

TECHNICAL SKILLS

Languages: Java, TypeScript, SQL

UI Automation: Playwright, Playwright TypeScript, Selenium WebDriver, Selenide

API Automation: REST Assured, Postman, Playwright API Testing

Mobile Automation: Appium, Android Automation, iOS Automation, TestMu AI

CI/CD & DevOps: GitHub Actions, Git, Maven

Reporting: Allure Reports

Databases: PostgreSQL

Methodologies: Agile Testing, Regression Testing, Smoke Testing, Sanity Testing, Exploratory Testing, Shift Left Testing, Quality Engineering

ACHIEVEMENTS

- Reduced regression execution effort by 34+ hours per release cycle.
- Increased automation coverage by 30%.
- Maintained near-zero production defects.
- Built automation infrastructure supporting Release Validation and PostgreSQL Migration Testing.
- Delivered Playwright-based Automation Architecture for Enterprise SaaS applications.

EDUCATION & CERTIFICATIONS

B.Tech – Electronics & Telecommunication, Bhilai Institute of Technology | CPI: 9.03

Certifications: Selenium Automation Testing, API Automation Testing, Mobile Automation Testing, Selenium Practitioner (Cognizant)
